

Statement on REACH

REACH (Registration, Evaluation, Authorization and restriction of Chemicals) was established by Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 and established the ECHA (European Chemicals Agency) to regulate chemicals and their safe use. The list of SVHCs (Substance of Very High Concern) was published by the ECHA in 2008 and most recently updated in January 2021. Interface understands the ECHA plans to update the SVHC list up to twice per annum.

Substances of Very High Concern (SVHC) as listed on the Candidate List of Substances of Very High Concern at concentrations above 0.1% (w/w). Section 4.1 of the guidance document covers substances in articles that are (a) intended to be released from articles during normal conditions of use, and (b) the total amount of the substance produced or imported in all articles exceeds 1 ton per year. The articles produced by Interface, and covered under this statement, do not exceed the limits and therefore do not require registration or notification.

Currently, there are no SVHCs present in Interface products above a threshold limit of 0.1% (w/w). Per current SVHC List 01/19/2021; 211 substances listed.
